

## Thermo-Shield Fire Resistance

**In 2003, the Jones Valley Wildfire  
in Redding, California  
roared through this community,  
destroying everything in its path  
including this next door  
neighbors home**

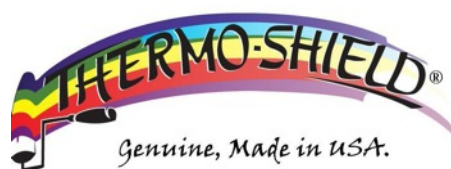

**Same view up neighbor Kay S.'s driveway, except Kay's home is still there! Kay supplied these pictures of her Thermo-shield coated home, showing little sign of the devastation all around.**

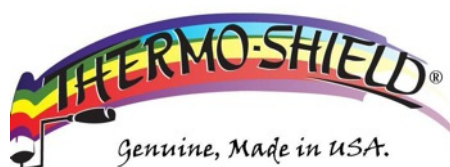

**“The heat melted the door trim right off. This is a solid aluminum door and the trim is aluminum as well “! Kay S says “I will tell everyone I meet that Thermo-shield saved my home.”**

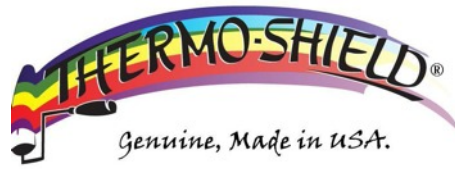

**The fire burned the wood framing right off of  
this backyard garden area, but the house  
looks like new !**

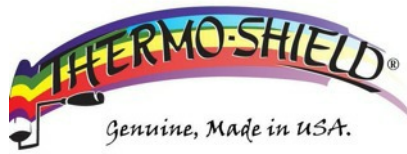

**AND THIS IS OUR STANDARD FORMULA,  
WE ALSO OFFER A U.L. Class A  
FORMULA**

# Looking “up the valley”

**Back yard view looking “down the valley”. The fire marshal says he has never seen anything like it! The homes that survived have only one thing in common, THERMO-SHIELD PROTECTION**
