

# THERMOSHIELD® WOOD AND DECK COAT

- EXCELLENT SEALING OF WOOD
- RESTORES APPEARANCES OF OLD SURFACES
- UV BLOCK PROTECTS SUBSTRATE FROM SUN'S ULTRAVIOLET RAYS
- MOISTURE RESISTANT
- DRIES TO A CLEAR MATTE FINISH
- BEAUTIFIES AND ENHANCES WOOD GRAIN
- DEEP PENETRATING RESIN PROTECTS WOOD LONGER
- IDEAL FOR HORIZONTAL OR VERTICAL SURFACES
- RESISTS MILDEW
- EASY APPLICATION WITH BRUSH, ROLLER OR SPRAY
- SOAP AND WATER CLEANUP

## PRODUCT INFORMATION

Thermo-Shield® Wood and Deck Coat is a water based sealer which contains the finest resins available and provides a long-lasting finish which out performs conventional sealers. Thermo-Shield® Wood and Deck Coat has been tested for U.V. and Moisture Resistance under ASTM.

Rain and sun attack unprotected exterior surfaces resulting in costly damage to your wood surfaces. Water soaks deep into exterior surfaces causing them to expand. The sun's heat pulls moisture out of the surface leaving it dry and brittle. This ongoing cycle of expansion and contraction causes wood to swell, crack and splinter.

Thermo-Shield® Wood and Deck Coat a multi-surface coating has four-way benefits.

### Manufacturer's Note:

This product is not intended for use on furniture or for interior applications.

\*\*\*\*\*

Coverage is 200 to 350 sq. ft.  
per gallon per application

### DISTRIBUTED BY:

## FOUR-WAY BENEFITS

### 1. U.V. Block

Thermo-Shield® Wood and Deck Coat contains U.V. Block protection, a special additive designed to protect against the sun's harmful rays.

### 2. Moisture Resistant

As it penetrates deep into the surface, Thermo-Shield® Wood and Deck Coat provides a clear finish that blocks out water, while allowing the surface to breathe. The protection goes on long after the water beading stops.

### 3. Beautifies and Enhances

Thermo-Shield® Wood and Deck Coat beautifies and enhances wood surfaces old and new as it dries to a clear matte finish.

### 4. Deep Penetrating Acrylic Latex Resins

The resins in Thermo-Shield® Wood and Deck Coat penetrate deep into the wood fibers binding them together giving longer protection. They bond old wood surfaces reducing splintering.

## APPLICATIONS FOR WOOD

- Thermo-Shield® Wood and Deck Coat protects all types of wood from damaging water penetration (including pressure-treated wood)
- Reduces splitting, swelling, warping, shrinking and grain-raising caused by water damage
- Resists graying and fading caused by exposure to the sun
